Class 2—Medium to Large Trees

Trees suitable for planting in tree lawns 5 to 6 feet wide or larger and **at least** 2 feet from curb (or edge of street if there is no curb) and/or sidewalk. Always remember that the Public Works department will need 14-foot clearance from the edge of the street skyward for its snowplows and will prune the larger branches to get that clearance. So, while the trees listed below may not disturb sidewalks or streets, their form may need skilled pruning to give vehicular clearance.

Class 3—Large Trees

Trees suitable for planting in tree lawns 7 to 8 foot wide or wider and **at least 3 feet from curb** (or edge of street if there is no curb) and/or sidewalk. Always remember that the Public Works department will need 14-foot clearance from the edge of the street skyward for its snowplows and will prune the larger branches to get that clearance. So, while the trees listed below may not disturb sidewalks or streets, their form may need skilled pruning to give vehicular clearance. For large trees proper spacing is also an important consideration. Many of these trees have a spread of 40 to 70 feet. In time, one of these trees can simply overwhelm other trees nearby.
